Bijith P N

bijithpn@gmail.com / 7994552488 / Bijithpn / bijith.in

High-qualified Flutter programmer with knowledge in UX UI design, and experience in building eye-catching and user-friendly apps. My strengths lie in understanding Flutter basis and I can use my state management, Firebase integration, REST API integration, local database, and UI design skills to deliver good solutions. I am a dedicated learner, who keeps abreast of the latest happenings in mobile app development.

Skills

- Firebase, Google cloud console
- Dart, HTML, CSS
- Node.js and Express.js
- CI / CD

- Git, Github, BitBucket
- REST API integration
- State Management: Provider, Getx
- Third-party package integration

EXPERIENCE

Freelancing   **June 2022 - August 2022**

Collaborate with the project team to understand requirements and objectives. Write clean, maintainable, and well-documented code. Troubleshoot and debug issues to improve application performance and functionality.

Sigosoft   **September 2022 - Present**

Developed and maintained Flutter applications for diverse clients, ensuring adherence to project requirements and deadlines.Collaborated closely with designers and backend developers to implement intuitive user interfaces and seamless user experiences.Implemented responsive designs, ensuring optimal user experiences across various screen sizes and orientations.

Education

Bachelor of Computer Application
2019 - 2022 | University of Calicut

Higher Secondary Education
2016 - 2018 | IHRD

PROJECTS

Sheegr
- Food Delivery Implements a local SQL database for offline access and caching of seafood data
- Implements GetX state management for efficient state handling and navigation within the app
- Offers a wide variety of seafood options with detailed descriptions, including types, sizes, origins, etc.

Dhaamiye
- Utilises Google Maps API for location-based features
- Geolocation services for accurate tracking and navigation
- User-friendly interface for easy ordering and tracking of fuel deliveries, etc.

Spotify clone (Personal project)
- Implement OAuth 2.0 authentication flow to allow users to log in using their Spotify credentials.
- Integrate the Spotify SDK for Flutter to enable seamless interaction with the Spotify platform.
- Set up listeners to receive real-time updates on player state changes (e.g., track change, playback status).

Animated Mouse Cursor (Flutter Package)

- Utilize the package to easily customize the appearance of the cursor with various pre-built designs or create your custom cursor shapes.
- Implement the package effortlessly with simple integration steps, making it accessible for developers of varying experience levels.
- Integrate the animated_mouse_cursor package to add dynamic and animated effects to the mouse cursor in your Flutter app.

Salesspark

- Implement reporting features to generate customized reports based on ERPNext data.
- Reflect ERPNext's user roles and permissions within the Flutter app to ensure proper access control.
- Develop a synchronization mechanism to ensure data consistency between the Flutter app and ERPNext.

MedChoice

- Develop a user-friendly interface to create, modify, and manage shifts for hospital staff.
- Allow administrators to set up recurring shifts and customize schedules based on department requirements.
- Integrate the go_router package for efficient and customizable navigation within the Flutter app.
- Optimize navigation for different screen sizes and orientations, ensuring a smooth experience on both mobile and website.
